# Alpha Lubrication Service

- optimisation

An Alpha Lubrication Service provides an overhaul of the system and highlights potential problem areas requiring attention to avoid future system breakdown. The problems we uncover can usually be resolved by changing minor parts and avoid extensive damage in the future.

### Potential problem areas:

- ★ Liner wear
- ★ Worn out piston crowns
- ★ Liner ovality
- ★ Excessive lubrication

These can be avoided by ensuring the system works optimally.

### What we do:

- ★ Live simulation of the lubricator.
- ★ Performance test of every lubrication point.
- ★ Internal leak test.
- ★ Pressure release test.
- ★ Test of quills.
- ★ Flow test.
- ★ Timing adjustment.
- ★ Power calibration.
- ★ Feed rate control.

### Turnkey solution:

- ★ We provide testing equipment.
- ★ We provide special tools.
- ★ We provide a spare parts kit specific to your system.
