Engine overhaul

- Fleet agreement

We work together with you to ensure the overhaul is completed as efficiently as possible. By efficiency we mean attending with the right people, the correct tools, replacing only what is necessary and offering an exchange programme.

We attend with only 2 service engineers and carry out the overhaul together with 2 dedicated engine crewmembers for the required days.

This reduces the attendance costs. In addition, the crew will obtain invaluable training experience by working with our team during the overhaul process.

We believe in working **with** our customers and not just for them.

We work closely together with each vessel's superintendent to ensure that:

- ★ The overhaul is planned for the required level of running hours.
- ★ We can deliver spare parts, or prepare a requisition for easy ordering of parts from your preferred supplier.
- ★ All necessary parts and toolbox are onboard prior to attendance.
- ★ The overhaul is completed to maker's specifications.
- ★ The overhaul is completed as efficiently as possible with experienced engineers.
- ★ Only damaged and worn out parts are replaced.
- ★ Remaining parts are cleaned, measured, inspected and reused.
- ★ Valves and rotocaps are replaced with overhauled on exchange basis.
